PROJECTS

1) AiHub - ML Android Application

Android, GCP, Tensorflow, Firebase, Docker

- Developed an Android Application With Variety of Regression and CNN Based ML Models to Use and Learn
- Developed Models Api docker service and deployed it on Google Cloud Platform Cloud Run
- This project is aimed at creating a learning platform for AI/ML. In addition to this, an open source API featuring multiple regression and CNN-based ML models has been published for the community to use in their own projects.

2) Careitable - Charity & Donations App

Android, Firebase

- Developed an Android Application to make cash and non-cash donations from the convenience of your house

EXPERIENCE

Technical Coordinator

Oct 2022 - Present Google Developer Student Clubs

As the technical coordinator of GDSC, I am responsible for managing and coordinating all technical aspects of the club ranging from event planning and execution to the projects we undertake. This includes conducting workshops and seminars regarding new and emerging Google technologies.

Web & Android Developer - Intern

Sep 2022 - Nov 2022 Archeva Smart Home Solutions

Development of Smart Home Device control Android App and Website
